Executive Summary

Full-Stack Developer skilled in the MERN stack, building scalable web and mobile apps with clean APIs and real-time features. Actively learning data structures and algorithms to improve backend and problem-solving capabilities. Exploring AI and its applications in automation, intelligent systems, and real-world integrations.

Education

Coimbatore Institute of Technology

2021 – Present

Master of Science in Software Systems (Integrated)

CGPA: 8.30

Technical Skills

Languages: Python, C++

Frontend: JavaScript, React (Web & Native), HTML, CSS,

Backend: Node.js, Express.js

Databases: MongoDB, MySQL

Tools & Frameworks: Git, Postman, Firebase, MongoDB Atlas, AWS

Area of Interest

Full-Stack Development Data Structures and Algorithms Object Oriented Programming

Database Management Systems Artificial Intelligence

Experience

Full Stack Developer (Part-Time) — Create Digital Solution

Dec 2024 – May 2025

- Built **5+ responsive static websites** using **React** and **Bootstrap**, tailored to client branding and content needs.
- Integrated contact forms using **email.js** to support **real-time email communication** from users.
- Delivered **mobile-friendly** sites with **fast loading** and smooth navigation.

Full Stack Developer (Full-Time Intern) — TIA IT Wing

Jul 2024 – Nov 2024

- **Streamlined form workflows**, reducing manual processing time by **60%** and improving staff turnaround.
- Deployed **JWT-secured APIs** and hosted scalable backend services on **AWS EC2**, improving uptime.
- Built and integrated dynamic **frontend interfaces** with **backend REST APIs**, enabling seamless user interactions and real-time data updates.

Full Stack Developer (Part-Time Intern) — TIA IT Wing

Feb 2024 – Jun 2024

- Assembled a **reusable component system** in **React**, reducing UI build cycles by **35%**.
- Gathered **project requirements** and ensured accurate data flow for development.
- Explored **backend systems** and complex **MongoDB queries** to strengthen development skills.

Projects

CodeCraft – AI-Powered No-Code UI Builder

React, OpenAI, Firebase, Razorpay

- Developed an **AI-based platform** to generate **production-ready frontend code** from **natural prompts**.
- Managed **credit access system** via **Razorpay** and **Firebase Auth**, monetizing **100+ code generations**.
- Reduced user development time by **50%** through **real-time previews** and **one-click Vercel deployment**.

FlavOr – AI-Powered Food Discovery App

React Native, Firebase, OpenRouterAI, YouTube API

- Delivered a **multilingual food app** generating recipes from **ingredients**, **voice input**, or **dish images**.
- Integrated **OpenRouter AI** and **YouTube API** for **translated steps** and video suggestions.
- Achieved **85%+ user satisfaction** through **AI-powered image feedback**.

TIA – Centralized Operations Hub

MERN Stack, AWS

- Architected a **company-wide operations suite** for **8 user roles** and **10+ department functions**.
- Consolidated **CRM**, **revenue**, **chat**, and **reporting** into one portal, improving **internal workflows** by **50%**.
- Built **role-based access** and **real-time sync** for secure, responsive **multi-department workflows**.

Certifications

- **Web Developer Bootcamp** — Udemy (2024)
- **Developing Front-End Apps with React** — Coursera

Leadership & Achievements

- Solved **450+ DSA problems** across **LeetCode/GFG**.
- Reached **finals** in **SensAI Hackathon (HyperVerge)**, ranked **top 6** out of **45+ teams**.
- Led a **4-member dev team** and managed **4 deployments** during **8-month TIA internship**.
- Completed **5+ freelance projects** with **5-star ratings** and **zero deadline extensions**.
