Education

Coimbatore Institute of Technology *2021 – Present*
Master of Science in Software Systems (Integrated)
CGPA: 8.22

Technical Skills

Languages: Python, JavaScript
Frontend: React (Web & Native), AngularJS, HTML, CSS, Bootstrap
Backend: Node.js, Express.js, Django
Databases: MongoDB, MySQL
Tools & Frameworks: Firebase, AWS, Git, Postman

Area of Interest

Full-Stack Development **Data Structures and Algorithms** **Object-Oriented Programming**
Artificial Intelligence **Database Management Systems** **Prompt Engineering**

Experience

Full Stack Developer (Full-Time Intern) — Predigle *Dec 2025 – Present*

- Built scalable AngularJS/React dashboards with reusable components for enterprise workflows.
- Developed REST APIs using Django and Node.js, improving performance and system reliability.
- Implemented secure authentication, role-based access, and smooth zero-downtime production deployments.

Full Stack Developer (Part-Time) — Create Digital Solution *Dec 2024 – May 2025*

- Developed **5+ responsive websites** with React and Bootstrap, with client branding and functional requirements.
- Integrated **real-time contact forms** using email.js, enhancing user engagement and response efficiency.
- Delivered **mobile-friendly interfaces** with fast loading and smooth navigation, improving user retention.

Full Stack Developer (Full-Time Intern) — TIA IT Wing *Jul 2024 – Nov 2024*

- Streamlined **form workflows**, reducing manual processing time by **60%** and improving staff efficiency.
- Deployed **JWT-secured APIs** on AWS EC2, ensuring scalable and reliable backend performance.
- Integrated dynamic **frontend interfaces** with REST APIs for seamless real-time data updates.

Full Stack Developer (Part-Time Intern) — TIA IT Wing *Feb 2024 – Jun 2024*

- Built a **reusable React component library**, reducing UI development cycles by **35%**.
- Collected and analyzed **project requirements**, ensuring accurate backend and frontend data flow.
- Strengthened backend skills with **complex MongoDB queries** and optimized data handling.

Projects

CodeCraft – AI-Powered No-Code UI Builder
React, OpenAI, Firebase, Razorpay

- Built an **AI-driven platform** generating production-ready frontend code from natural language prompts.
- Managed **credit access** with Razorpay and Firebase Auth, monetizing **100+ code generations**.
- Reduced development time by **50%** via real-time previews and one-click Netlify deployment.

Roomz – Room Booking System
React.js, React Native, Electron.js, Firebase

- Developed a **fully-featured cross-platform booking system** supporting web, mobile, and desktop platforms.
- Implemented **room management, bookings, and active room tracking** fully functional according to client requirements.
- Enabled **management interface** to monitor rooms, bookings, payments, and analytics efficiently.

Paygate – Secure Payment Gateway
MERN Stack, JWT, AES-256-GCM

- Developed a **prototype payment gateway** for secure transactions between customers, merchants, and banks.
- Implemented **admin approval workflows** for onboarding, settlements, and refunds using **KYC verification**.
- Enabled multi-bank UPI support with **OTP-based** authorization and **AES256GCM** encrypted communications.

Certifications

- Web Developer Bootcamp — Udemy
- Developing Front-End Apps with React — Coursera

Leadership & Achievements

- Solved **450+ DSA problems** on LeetCode and GFG.
- Reached **top 6 finalists** in SensAI Hackathon (HyperVerge) among 45+ teams.
- Led a **4-member dev team**, managing **4 deployments** during 8-month TIA internship.
- Completed **5+ freelance projects** with 5-star ratings and zero deadline extensions.
